EDUCATION

Dayananda Sagar College Of Engineering

Bachelor of Engineering - Electronics and Communication Engineering

2022 - 2026

TECHNICAL SKILLS

Languages: HTML ,CSS ,Javascript, C++, Python

Technologies/Frameworks: React.js , Node.js

Version Control: Git, Github

AI/ML Tools : Numpy, TensorFlow, PyTorch, Keras

Databases: MongoDB, SQL

Other Skills: Data Structures and Algorithms, MS Office

EXPERIENCE

Startup Folks

August - October 2025

Frontend Developer : Javascript,React.js

Intern : Bangalore, India

- Developed and maintained responsive, high-performance web applications using React.js, enhancing user experience (UX) and minimizing UI inconsistencies
- Implemented performance optimizations on client-side applications, significantly reducing page load times and improving overall site responsiveness

BlueStock

January 2026 - Present

SDE Intern

Intern : Bangalore, India

- Building and maintaining scalable web applications by developing APIs, managing databases, and implementing frontend components.
- Contributing to fintech software development by working on stock market-oriented systems such as trading and payment platforms.

PROJECTS

Telegram Bot | Python | Github

- Developed Python telegram API to mitigate cyber-bullying through automated content monitoring to identify inappropriate messages and harmful content, issuing warnings, removing messages, or banning users .

Web Scraper | Python | Github

- Built a Python-based web crawler to systematically scan and index all publicly accessible pages of a website, identifying unwanted links pointing to a specific page.

Portfolio Page | Python, React, Javascript | Github

- Developed a personal portfolio website showcasing an introduction, projects, and skills in a structured and visually appealing manner. Integrated various Profile links to enhance accessibility and professional networking.

Audio Steganography | Python | Github

- Developed a GUI-based steganography system using Tkinter, enabling secure embedding and extraction of text, images, and audio within WAV files.

Fake News Detection via Lip Sync | Python- CNN-LSTM | Github

- Developed a deep learning model combining Convolutional Neural Networks (CNNs) and Long Short-Term Memory (LSTM) networks to recognize spoken words based on visual lip movements in video sequences.

ACHIEVEMENTS

- Placed 4th among 50 teams in Hack-O-Rama Hackathon conducted at DSCE, Bengaluru -Jan 2024
- Participated in National Hackathon Aventus 2.0 at DSCE, Bengaluru - May 2024
- Participated in National Hackathon Aventus 3.0 at DSCE, Bengaluru - May 2025

LICENSE AND CERTIFICATIONS

NPTEL Certified in Cloud Computing - April 2025

Certified in C programming fundamentals through Google Developers Launchpad - August 2022

VOLUNTEER EXPERIENCE

Web-3 Community

Member of a dynamic team driving Web3 and blockchain innovation

Bengaluru, India

Jan 2023-Present

NUMERANO (Maths Club), DSCE

Core Member of the Club

Bengaluru, India

Jan 2023-Present
